

## No More Wasted Samples.

Every sound in our sample packs has been carefully created and selected by our curation team allowing you to produce instantly. We analyze current charts, rising hits and future trends to bring high-quality samples that are exciting and valuable. We value quality over quantity.

Every sample is useful. No waste. Ever.

## Creativity Unleashed

Sound Constraints was created to tackle the creative stumbling block caused by the majority of sample packs. We were tired of buying sample packs stacked with “150 presets” and “1000 bonus drums”. They’re excessive and require endless browsing, just to find one actually useful sample. It left us frustrated, lost and out of precious production time.

A revolution was needed.

## Carefully Crafted Sounds

As musicians and producers ourselves, we’ve put our heart into bringing exciting, high-quality samples that can easily be molded into your latest track. We’ve filtered our own work, leaving you with only our very best samples.

## “Unlimited choices are Creative Poison.”

Today’s music production environment has an overabundance of choice. It’s over-saturated. At first glance, it might seem useful to have 3,000 snare samples available, but it just drains energy and stops creative bursts.

Our goal is to change the habit of wasting time to allow you to be creative. Our samples allow you to get on with laying down sounds you want.

You find an exciting sound fast, and can get producing!
